STRAWBERRY PLANTS

All of our pot-grown plants are strong and well rooted, being grown in two and one-half inch pots, and are shipped in the pots in which they are grown, thereby insuring safe shipment, the roots undisturbed, allowing them to be transplanted to the best advantage.

Pot-grown Strawberry Plants are usually ready for delivery after August 1st.

Strawberries when planted during August or September produce a fine growth during the fall and insure a good crop the following Summer.

"DE LUE'S JUDITH." (New).

This new early seedling was awarded the Silver Medal by the Mass. Horticultural Society in 1915 and three first prizes in open competition at the annual show of the same society in 1917.

The "DeLue's Judith" is a perfect blossom variety.

It is very large and carries its size well throughout the whole season, making it one of the most valuable for the home garden. The color is deep red all through and quite glossy. It is of good form and has no superior for flavor; is very smooth in texture and without core. Its firmness and fine appearance makes it a fine shipping berry for market gardeners. Price, each 20c; per doz., \$2.00; per 100, \$15.00.

HOWARDS NO. 17.

The plants of this dependable and new Strawberry are of medium size with dark green foliage. The berries are conical and pointed, of good size and color with a flavor which is unique, distinct and delicious. It is a splendid market berry and a coming favorite with all who grow it. Price, each, 12c; per doz., \$1.25; per 100, \$8.50.

PREMIER. (New).

A very early and productive variety, producing mammoth berries; of excellent form and flavor, bright red all through with very delicious flavor, strongly recommended as a high-class berry; without doubt this is one of the best strawberries of recent introduction. Price, each, 15c; per doz., \$1.50; per 100, \$10.00.

ST. MARTINS. (New).

The plants are strong with a beautiful deep green foliage. The berries are freely produced, very large and uniform; very similar to Marshall but of superior quality and color. An excellent keeper and a wonderful shipper. Awarded the Silver Medal at Mass. Horticultural Society and gained many notable awards during the past seasons. This remarkable berry was originated by McLouis Gratton of Whitman, Mass. Price, 20c; per doz., \$2.00; per 100, \$15.00.

FALL OR EVERBEARING VARIETIES

Everbearing strawberries are now extensively grown both for home use and for market. They bear fruit steadily from early June until December. To get a large crop during the latter part of summer and in the fall, the blossoms should be picked off until about July 1st.

PEERLESS. This variety is considered to be the best everbearing sort yet raised. The fruit is rich in color and sweet in flavor, of good size and form.

PROGRESSIVE. A very choice everbearing sort with plants similar to the Dunlap, being strong, healthy and very hardy and a good plant maker. The Progressive is one of the most perpetual, producing good berries of medium size, dark red inside and out.

SUPERB. The fruit of this excellent variety is very large, glossy dark red color, particularly firm and choice quality. The berries are of exceedingly uniform size and shape and a rich blood red from outside to centre.

Price, per doz., \$1.00; per 100, \$6.50; per 1000, \$55.00.

STRAWBERRY PLANTS

ABINGTON. (Midseason.) A strong growing native variety of recent introduction. The fruit is of large size, bright red in color, very solid and of excellent flavor.

AROBINE. A new Berry—and one with all the good qualities required to suit both the home and market-growers; medium large in size; very free in flower and fruit; excellent color and form; flavor unsurpassed.

BARRYMORE. This fine strawberry was awarded a Silver Medal by the Massachusetts Horticultural Society in 1908, for its excellence. The plants are of strong growth and very productive. The conical shaped berries are of medium size and of a dark, glossy, crimson color; the flesh is a rich red and very juicy.

BELMONT. (Late.) One of the standard varieties and always reliable, and without exception the berry whose flavor has not been excelled. Fruit is of medium size, firm and heavy; the color a deep, rich red, shading light at the centre. As to its keeping qualities it is without doubt the best.

BRANDYWINE. (Midseason.) A strong growing merical growers for its quality as a shipper. Color blood red; round; yields very large crops of finest quality berries.

CHESAPEAKE. Plants large and vigorous with deep green foliage. Fruit large deep red in color and of a rich aromatic flavor.

COMMONWEALTH. (Late.) A berry of Massachusetts origin and one which has a long fruiting season; it is probably as large as any berry at the present time and fully as productive. Its color is that dark crimson so much admired and unexcelled for its fine flavor.

EXCELSIOR. (Extra Early.) One of the earliest berries in existence; unusually productive owing to its early fruiting season. The fruit is of round, conical form, of fair size and excellent flavor. The color a dark red and glossy, holding nearly to the center.

HAWATHA. A late variety, ripening about the same time as the Commonwealth which it closely resembles in size and firmness, but of a better color and flavor. A variety adaptable to most soils.

GLEN MARY. (Midsummer.) An excellent berry for quality, large size and productiveness, and one that meets all requirements for home and market use. Usually the last berries picked are as large as the first. The color which is a deep glossy crimson is very attractive; the fruit is firm and solid and of excellent flavor.

GOLDEN GATE. (Midseason.) This variety is a particularly strong grower, producing large, strong blossoms, making an exceptional sort for planting with the pistillate sorts for pollenizing. Fruit is a rich crimson, rarely showing fruit with green tips.

MARSHALL. (Midseason.) Undoubtedly the best strawberry for home use and one of the best as an exhibition berry, usually taking a prize wherever exhibited. The color is one greatly admired, being a rich, glossy crimson, with this deep color running nearly to the center.

NEW YORK. One of the best sorts for private or market gardens. The berries are large, of conical form; dark red color, firm texture and of remarkably sweet flavor. In the market they sell at sight.

ROOSEVELT. A midseason variety. Habit vigorous and strong. Fruit is much larger than Marshall, but similar in shape, color being a somewhat lighter crimson.

SENATOR DUNLAP. (Midseason.) Is one of the universally popular varieties; famous as a shipper. Color dark red; top-shaped; fruit large, rich flavor.

WILLIAM BELT. A luxuriant grower. Healthy and hardy, long and conical in shape, color deep red all through. An excellent variety for private growers. A good keeper and shipper; the flesh being firm and solid to the core.

HOUSE OR ROOM GARDENING

When our materials are used the following hints on cultivation should be followed: Sprinkle fibre, which should be thoroughly moistened, over the bottom of the bowl to a depth of 1½ inches, carefully place the bulbs upon the fibre, taking care that they do not touch each other, then fill up the bowl with fibre. Although it is desirable that the fibre should be all around the bulbs, it must not be packed too tightly, and must cover the top of the bulbs.

Start the bulbs into growth by thoroughly saturating the fibre with water, drain off and keep moist; then place the bowl in an airy room or shelf in a subdued light. When the young growth pierces the fibre, the bulbs may be placed on a table near a window or some other light place to mature their growth and come into flower.

Lilium Candidum

Planting time for lilies ranges from September 1st to December or until the ground is thoroughly frozen. The depth to plant each variety varies, some require to be planted deep to assure them doing well. On an average, however, 6 inches is a very satisfactory depth to plant the ordinary run of lily bulbs to insure success.

LILIUM CANDIDUM

The white Lily of English gardens, also known as the Madonna Lily.

No other flower possesses such a history as this white Lily, which in all ages has been deemed the emblem of purity and chastity. It is perfectly hardy, and thrives in almost any soil.

We recommend our customers to plant this variety early. Bulbs are ready beginning of September.

LILY OF THE VALLEY

A crown is the description given to a single rootlet. They are generally sold in bundles of 25, and are most serviceable in a number of ways for decorative and forcing purposes. A clump is a large conglomerated mass of roots that will throw up a quantity of flowering spikes, either forced or when planted out of doors. Clumps are preferred for a permanent bed in the garden. If by parcel post add postage at zone rates; weight of crowns 2 lbs. per bundle of 25.

CARTERS FINEST SELECTED CROWNS. For forcing. Per bundle of 25, 1.00; per 100, 3.50; per 1,000, 30.00.

RETARDED LILY OF THE VALLEY

By availing ourselves of the modern method of cold storage we are enabled to supply forcing roots of this pretty decorative plant throughout the year.

GIANT FLOWERING RETARDED CROWNS for all Seasons. Per bundle of 25, 1.15; per 100, 4.25; per 1,000, 35.00.

LILY OF THE VALLEY CLUMPS. Field-grown. Each, .45; per doz., 5.00; per 100, 37.00.

PÆONIES

This family of plants on account of its stately beauty of bloom in such infinite variety of colors is indispensable for every garden. They are perfectly hardy, requiring no protection whatever, even in the most severe climate, and once planted increase in beauty each year.

Pæonies require a good rich, deep soil, and an abundant supply of water during the growing season. An important point to observe is not to plant too deep. The roots should be planted so that the eyes will be 2 to 3 inches below the surface. Too deep planting is a frequent cause of shy flowering.

DOUBLE HERBACEOUS PÆONIAS.

SINGLE EARLY TULIPS

For our customers' guidance when making a selection of Tulips, we have numbered each variety in their order of flowering (No. 1 blooming first), so that by a careful selection a nice succession of blooms may be obtained, or, on the other hand, a grand display may be ensured by choosing only those varieties with the same number. For beautiful color effects we refer our readers to page 40 for our Royal Parks Selection of Single varieties, and for the Royal Parks Double varieties. These are selected for simultaneous flowering in each section, the Doubles being a week or so later than the Singles. All varieties marked with * are recommended for forcing.

If by parcel post add postage at zone rates; weight 7 lb. per 100. Collections and single bulbs mailed free

CARTERS TESTED GRASS SEEDS

Are To-day Being Used by Every Prominent Golf and
Country Club in the World.

GRASS SEEDS PRESCRIBED FOR ALL SOILS AND PURPOSES

For lawns, shaded lawns, tennis courts, golf courses, bowling greens, cricket grounds, football, baseball, and polo fields.

When ordering state whether the soil is light, medium, or heavy, as a mixture is sent accordingly.

Carters Finest Mixtures of Grass Seeds for Putting Greens or Tennis Courts. Mixtures of the very fine bladed species, which, if sown according to our recommendations, should produce a close, thick turf on all good soils, and are especially suitable for all games in which the ball is required to run true. Lots under 20 bushels—Per bush. (25 lb.), 13.50. Lots of 50 bushels or over, 13.00 per bush.

Carters Fine Mixture of Grass Seeds for Fair Greens, Trees, Lawns, Shaded Grounds, Football, Baseball, Polo Fields, etc. Mixtures not so fine as the above, but better adapted for the purposes where a turf of the finest texture is not required, producing a strong, hardwearing turf. Lots under 20 bushels—Per bush. (25 lb.), 12.00. Lots of 50 bushels or over, 11.50 per bush.

Carters Invicta Lawn Grass Seeds (with Rye Grass). An all-round mixture of fine, hardy grasses for lawns, golf courses, especially the tees, tennis courts, shaded grounds, etc. Lots under 20 bushels—Per bush. (25 lb.), 8.50. Lots of 20 bushels or over, 8.25 per bush.

Carters City and Suburban Mixture of Grass Seed (with Rye Grass). This splendid mixture is specially prepared for city and suburban grass plots, and for sowing around sheds and hangarows where fast results and a beautiful green turf is required. Sow at the rate of 1 oz. per square yard. Per lb., .35; 5 lb., 1.50; ½ bushel (12½ lb.), 3.50; per bushel (25 lb.), 6.50; lots over 50 bush. 6.25 per bush.

All above prices F. O. B. Shipping Point and subject to change without notice.

Sowing Grass Seed. (Quantity of seed required.) In sowing a new lawn, use 8 to 10 bushels or 200 lbs. per acre. Figure a small lawn at the rate of 1 oz. of seed per square yard. Use half the above quantities for renovation purposes and twice these quantities if a quick thick turf is desired.

DO YOU KNOW THE CARTER SYSTEM
of making Golf Courses, Lawns, etc. Write for our pamphlet, "The Making of a Lawn," which deals with the making and renovation of grassy lands, post free.

GRASS SEED MIXTURES

CARTERS STANDARD PRESCRIPTIONS

- Nitrate of soda.** Scarce and in much demand, being extremely soluble and immediately available. It is usually applied after the plants are above ground. 10 lb., 1.25; 25 lb., 2.50; 50 lb., 4.50; 100 lb., 8.00.
- Phosphate, High Grade Acid or Rock,** used generally with other fertilizers to increase the phosphoric acid analysis. Sold in 200 lb. bags only. 100 lb., 2.50; 200 lb., 4.25; $\frac{1}{2}$ ton, 18.50; 1 ton, 35.00.
- Salt (Agricultural),** valuable as a topdressing for asparagus or for killing weeds on gravel walks or driveways. Apply in spring. 100 lb., 1.75; $\frac{1}{2}$ ton, 15.00; 1 ton, 28.00.
- Scotch Soot,** a fertilizer and fungicide and an excellent preventative and remedy for mildew, blight and spot when mixed with sulphur and lime, one third of each. As a fertilizer it promotes growth and heightens color of both flower and foliage. Sold in original bags by freight only. Bag, 6.75.
- Sheep Manure (Rams Head Brand),** a soluble and quickly available plant food and strongly recommended for all purposes where a first class fertilizer is required. As a top dressing for general lawns it is unequalled. Use at the rate of 600 to 800 lbs. per acre. 100 lb., 3.25; $\frac{1}{2}$ ton, 27.50; 1 ton, 50.00.
- Sulphate of Ammonia,** mixed with other chemicals it is an excellent grass food being highly soluble. It is a quick nourisher, light rains or dews bring prompt results. Supply Doubtful. 25 lb., 3.50; 50 lb., 6.50; 100 lb., 12.00.
- Sulphate of Potash (High Grade)**—For the past season it has been impossible to obtain this chemical, present indications are that supply even now is very doubtful. 25 lb., 4.00; 50 lb., 7.50; 100 lb., 14.00.
- Tankage, Fine Ground,** a very rich and strong chemical fertilizer used by all the leading growers of roses, carnations, etc. 25 lb., 1.75; 50 lb., 3.25; 100 lb., 6.00.

Purchasers should order early to ensure prompt, seasonable shipment of their goods. Do not wait; send your order in now for future shipment. All orders should be written separately from general letters or letters of inquiry. Name and address in full, also the number of street or Post Office where goods are to be sent by mail. When ordering goods forwarded by express or freight state clearly the express or freight station.

DELIVERY OF GOODS

When orders are accompanied by cash we deliver free to any Post Office, Railroad, Express Office, or Freight Station, all vegetable and flower seed orders at the packet, ounce, quarter pound prices, also bulbs at the single rates, except where otherwise noted. Purchasers must pay transit on pints, quarts, pecks and bushel lots; all plants and bulbs, tools, fertilizers, grass seed, and insecticides, etc., sold f. o. b. Shipping Point unless otherwise noted.

CHANGE OF ADDRESS

Please notify us of any change of Address, in order that we may forward our Catalogues with regularity. The favor of your kind recommendation of our House to those of your friends requiring Seeds for the Garden or Farm, Plants and Bulbs for the Garden or Conservatory, is respectfully solicited.

NOTICE TO PURCHASERS

Bulb and plant orders are sometimes delayed by severe cold or hot weather, and they at all times take longer to execute than seed orders in consequence of the care in counting and packing. Customers to guard against errors in shipping should always retain a true copy of the order sent us.

It is also our earnest desire that all the requirements and directions of customers be scrupulously attended to. We respectfully request that we be informed if at any time there is cause for dissatisfaction.

AS TO CORRESPONDENCE

Any proper letter of inquiry will receive our careful attention and be answered promptly. Please favor us by stating all questions clearly and briefly.

ACCIDENTS IN TRANSIT

All goods are sent out securely packed, but beyond that we cannot be responsible for damage in transit. Notice of damage should be at once made to, and compensation claimed from the express or freight companies which delivered the article. Never sign for goods until you have examined the same and state clearly when signing the condition of goods when examined.

CONDITIONS OF GUARANTEE OF QUALITY

We guarantee our Seeds and Bulbs according to the quality purchased to be of the highest average standard of the season, and it is open to the purchaser to confirm this by submitting the sample to professional analysis at his own expense. We cannot, however, be in any way responsible for the produce of Seeds or other materials sold under this guarantee. While we exercise the greatest care to have all seeds, bulbs, plants and other materials true to name, we give no warranty, express or implied, as to description, quality, productiveness, or any other matter, and will not be held responsible for the crop. If the purchaser does not accept the goods on these terms and conditions, they must be returned at once for credit or cash refund.
